Introducing

**BOW
Superpex - the
most versatile, complete
potable pex system on
the market today!**

**We're Revolutionizing the
Pacific Northwest Potable Pex Market!**

Here are three great reasons to switch to
Rosen Supply's Bow Superpex:

- 1** Bow Superpex pipe is now approved for use with expansion-style fittings in accordance with ASTM F1960, as well as, a complete crimping system.
- 2** Bow Superpex provides the industry's best protection against chlorine and UV degradation. The three layer technology allows Superpex to exceed the highest NSF designation for chlorine resistance (NSF-CL5, formally NSF-CL-R) and provides up to six months of UV protection.
- 3** Bow Superpex is 20% more flexible than any other Pex tubing, and Superpex has the versatility to be used with multiple joining systems, meeting the following standards:

ASTM F1807-Standard Specification for metal insert fitting utilizing a copper crimp ring for SDR9 Pex tubing.

ASTM F2159-Standard Specification for plastic insert fitting utilizing a copper crimp ring for SDR9 Pex tubing.

ASTM F1960-Standard Specification for cold expansion fitting with pex reinforcing rings for use with Pex tubing.

ASTM F2080-Standard Specification for cold expansion fitting with metal compression sleeves for Pex tubing.

With the industry's best protection from chlorine and UV degradation, ease of installation and the widest choice of joining systems, Bow Superpex is the best overall pex.

Straight Lengths - Coils Polyalloy & Brass Fittings - Insert Fittings
